

TAIWAN

TRADE & INVESTMENT:
CREATING AND SUPPORTING AMERICAN JOBS

EXECUTIVE SUMMARY

In 2023, two-way trade between Taiwan and the United States reached a record \$128 billion, representing a significant milestone in the bilateral relationship.

Taiwan is the 8th largest trading partner for the United States overall, ranking higher than G20 members France, India, Brazil and Australia. Despite its small size, Taiwan is the 13th largest export market in the world for U.S. goods, and the 7th largest purchaser of U.S. agricultural products. The United States is Taiwan's second largest trading partner and a leading destination for Taiwan's overseas investment.

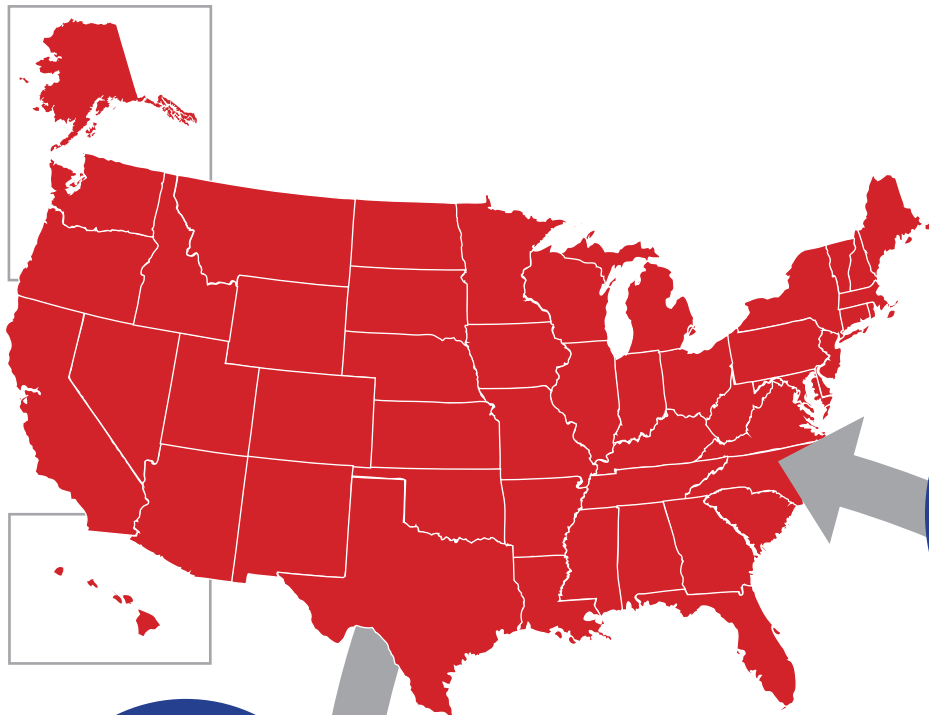

Based on U.S. data for exports to Taiwan plus U.S. investments by Taiwan-affiliated companies as surveyed, this booklet shows that trade and investment with Taiwan supports 360,440 well-paid American jobs in all 50 states and in several key territories.

This booklet, now in its fourth edition and updated with statistics for 2023, details the significant contributions by Taiwan to U.S. prosperity, innovation and growth. The data show how U.S. trade and investment relations with Taiwan bring benefits to the entire U.S. by creating jobs, making innovations possible, and helping U.S. firms to be more globally competitive and successful. The examples of Taiwan-affiliated companies included in this booklet show clearly that the U.S.-Taiwan trade relationship is both mutually beneficial and highly productive.

Since the last version of this booklet in 2018, U.S. exports to Taiwan have grown by 30%, thanks to efforts to promote bilateral collaboration by Taiwan and U.S. federal, state and local governments. Many states have experienced notable growth in exports since 2018, including:

- Exports from Alaska to Taiwan have increased by fivefold, primarily in the oil and gas sector
- Exports from New Mexico have quadrupled since 2018, led by computer/electronic products and chemicals
- Exports from Nevada have tripled since 2018, led by computer/electronic products and minerals

In 2023, the United States and Taiwan completed negotiations for the first phase of the U.S.-Taiwan Initiative on 21st Century Trade, a major milestone for bilateral relations. Taiwan will continue discussions with the United States to complete the agreement and foster a productive environment for economic growth and innovation for both sides. While we expect these efforts to further support the benefits and frequency of bilateral exchanges, this booklet illustrates the already-strong foundation of the economic partnership and provides insight into the areas that have benefited from trade and investment.

Taiwan-affiliated firms invested
\$92 BILLION
in the U.S.

The U.S. exported
\$40 BILLION
in goods to Taiwan in 2023

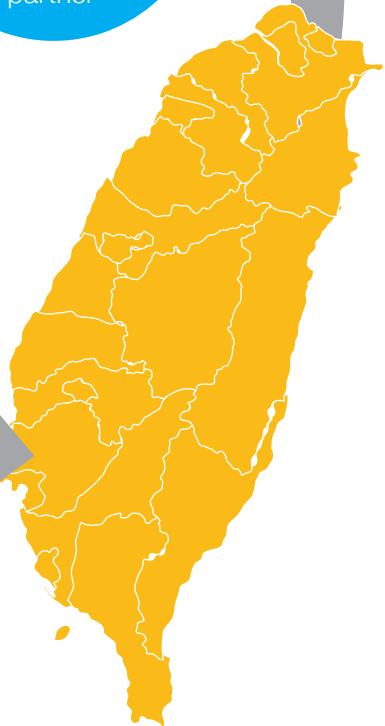

Taiwan is the United States'
8th LARGEST
trading partner

The U.S. is Taiwan's
2nd LARGEST
trading partner

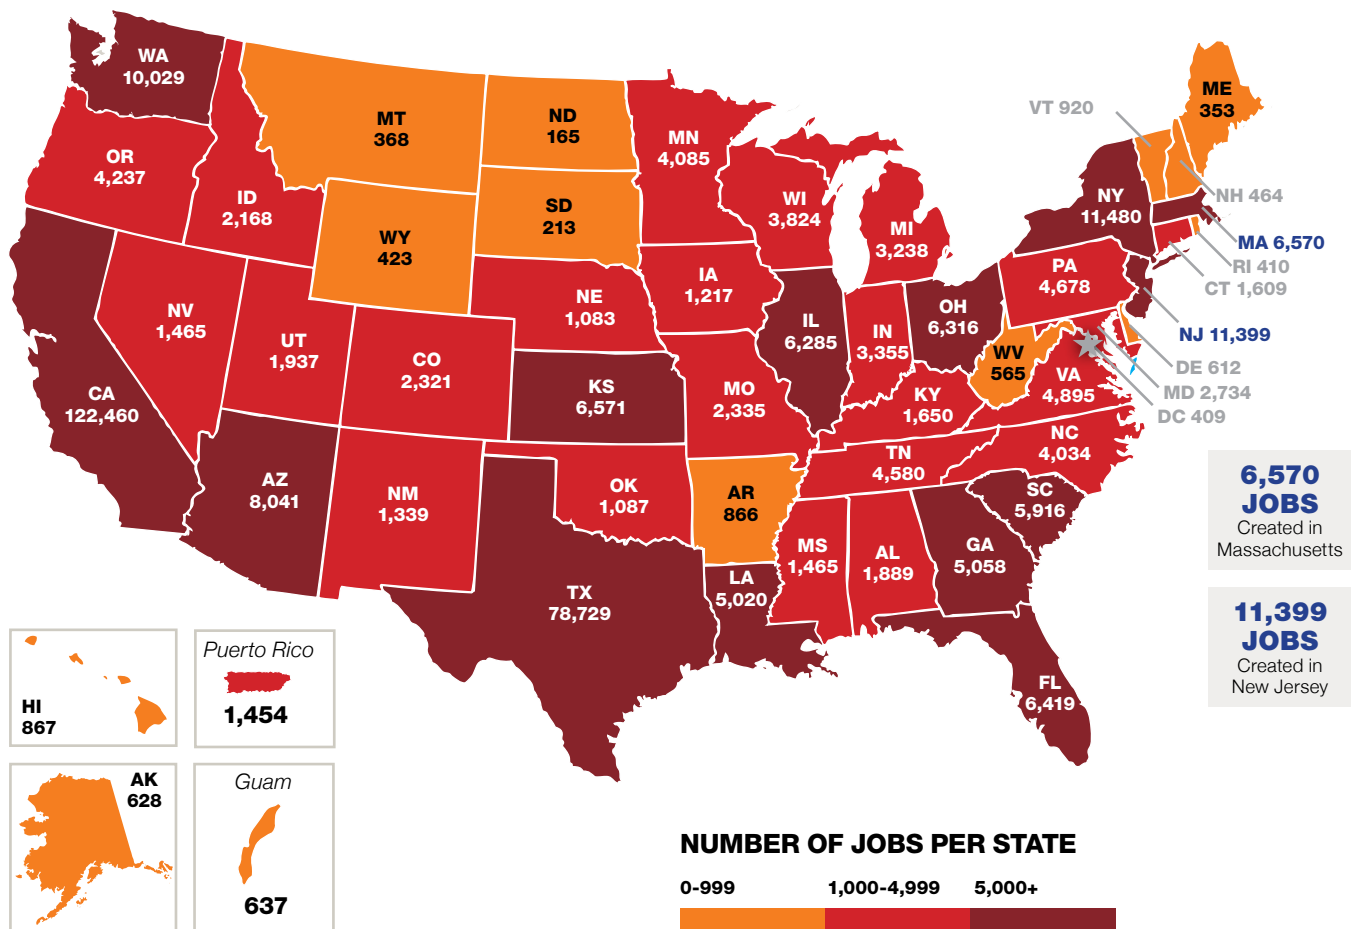

Taiwan is the
7th LARGEST
export market for U.S. agricultural products

The U.S. exported
\$11.9 BILLION
in services to Taiwan in 2023

JOBS CREATED IN 2023 BY U.S.-TAIWAN TRADE AND INVESTMENT

Taiwan Supports an Estimated

360,440 JOBS

in the United States

156,880 JOBS

ECONOMIC HIGHLIGHTS

**\$11.9
BILLION**

The amount of U.S. **exports in services** to Taiwan has **increased by 20%** (2018 to 2023)

**\$92
BILLION**

Taiwan-affiliated firms' investments in the U.S. have **nearly doubled** since 2019

**1ST
PLACE
IN 2023**

Computer & Electronic Products increased by **50%** (from US \$6.2 billion in 2018 to US \$9.3 billion in 2023)

**2ND
PLACE
IN 2023**

Oil & Gas doubled (from US \$3.5 billion in 2018 to US \$7.1 billion in 2023)

**\$40
BILLION**

The amount of U.S. **exports in goods** to Taiwan has **increased by 30%** (2018 to 2023)

Six states – **Alaska, New Mexico, Nevada, South Dakota, Alabama, Louisiana** – have **more than doubled** their exports to Taiwan. In the case of Alaska, New Mexico, Nevada, and South Dakota, exports have **more than tripled**.

Exports from **Alaska to Taiwan** have **increased by fivefold**, primarily in the oil and gas sector

Exports from **New Mexico** have **quadrupled**, led by computer/electronic products and chemicals

Exports from **Nevada** have **tripled**, led by computer/electronic products and minerals

More than two-thirds of U.S. states grew their exports to Taiwan, and **more than half of them grew exports by at least 30%**. These include states with as diverse economies as **Louisiana, Ohio, Maryland, and New York**.

**Jyh-Huei Kuo, Minister
Ministry of Economic Affairs, Republic of China (Taiwan)**

The release of this fourth edition booklet, updated from its 2019 version, comes at a pivotal time. Over the past five years, the global landscape has been reshaped by unprecedented challenges, including the COVID-19 pandemic and escalating geopolitical tensions. Amid these worldwide upheavals, the economic ties between Taiwan and the United States have not only endured but flourished. The robust expansion in bilateral trade and investment demonstrates that Taiwan is a reliable and indispensable partner of the U.S.; both share the same values of democracy and freedom. Most importantly, both countries adhere to rule-based international orders.

The bilateral partnership's positive impact is evident in the remarkable surge of investments. Taiwanese corporations have significantly increased their presence in the U.S. economy, with investments soaring to \$92 billion, nearly doubling since the last report. This substantial influx has generated high-value employment opportunities, bolstering the U.S. economy. Between the value of export to Taiwan and Taiwan's investments now support an impressive 360,000 jobs across the U.S. Notably, Taiwan emerged as the leading U.S. investor in 2022, with over \$30 billion in announced greenfield investments¹. These greenfield projects, involving the construction of new facilities, create jobs and demonstrate a profound commitment to the U.S. economy. You will find more details and examples across 50 states in the U.S. in this booklet.

The strengthening of Taiwan's economic ties with the U.S. in 2023 is a testament to the mutual benefits of this partnership. Taiwan has risen to become the 8th largest trading partner of the U.S. At the same time, the U.S. has maintained its position as Taiwan's 2nd largest partner. This realignment in two-way trade dynamics reflects the deepening economic collaboration between the two countries. This collaboration contributes significantly to the U.S. economy through Taiwan's investments and their employees in the U.S.

The Taiwan-US partnership has become increasingly crucial, especially in safeguarding essential supply chains for both countries and the democratic world. The U.S. Administration's focus on key industries like semiconductors, batteries, critical materials, and pharmaceuticals has spawned a comprehensive strategy emphasizing on-shoring, near-shoring, and friend-shoring. Industry experts predict that future globalization will prioritize security, intertwining technological and economic stability with national security concerns. Taiwan's investment in the U.S. will be a key factor in this evolving landscape, offering capital and reliable technology solutions that align closely with U.S. interests to develop worldwide markets. The economic and trade ties between Taiwan and the U.S. exemplify a model of strategic interdependence, with each playing an indispensable role in meeting the other's supply chain requirements.

Taiwan has aligned its industrial strategy with U.S. priorities, focusing on five key sectors: semiconductors, artificial intelligence, defense, security and surveillance, and next-generation communications. As President Ching-te Lai outlined, this strategic approach addresses concerns about economic concentration while promoting diversification. The Taiwanese government is proactively developing supply chain solutions that align with U.S. objectives to decrease dependence on authoritarian countries' resources and markets.

The US-Taiwan Initiative on 21st Century Trade holds excellent promise for further boosting economic prosperity for both countries. With the successful conclusion of the first phase of negotiations, we eagerly anticipate discussions on the remaining chapters. The potential elimination of double taxation between Taiwan and the U.S. is expected to further stimulate growth by fostering investment, job creation, and supply chain enhancement. Our government remains committed to deepening collaboration with U.S. federal, state, and local entities through platforms like the Economic Prosperity Partnership Dialogue (EPPD) and the Technology Trade Investment Collaboration Framework (TTIC).

I look forward to the further achievements of Taiwan's investment in the U.S., exemplifying our comprehensive approaches to further strengthening Taiwan-US economic bonds and fostering global supply chain security and resilience through strategic cooperation across all sectors..

1. According to data from the U.N. Conference on Trade and Development

**Alexander Yui, Representative
Taipei Economic and Cultural
Representative Office in the United States**

The U.S.-Taiwan trade and investment relationship reached unprecedented levels in 2023. Taiwan emerged as the 8th-largest trading partner of the United States, surpassing one South Asian nation with a population 60 times larger. Additionally, Taiwan ranked as the 13th-largest market for U.S. exports, outpacing two major European economies. In the agricultural sector, Taiwan was the 7th-largest market for U.S. agricultural exports, exceeding a significant European island nation despite having half its population.

As we commemorate the 45th anniversary of the Taiwan Relations Act, the United States and Taiwan have made significant strides in strengthening our economic partnership and securing a prosperous future for both economies. This milestone year has witnessed remarkable achievements that underscore the depth and breadth of our relationship.

In 2022, Taiwan emerged as the largest foreign investor in the U.S., announcing over \$30 billion in greenfield investments. These projects, which involve building new facilities from the ground up, demonstrate a substantial commitment to the U.S. economy and job creation. Taiwan's investments, particularly in the semiconductor and electronics industries, carry strategic significance in the context of global supply chain realignment and technological competition.

For example, TSMC a leading semiconductor manufacturer based in Taiwan, has committed to a monumental \$65 billion investment in Arizona, constructing three advanced semiconductor fabs. This project has already injected \$40 billion into the local economy, with approximately 13,000 workers involved in the construction phase daily. Once operational, the first two fabs are projected to create 1,600 high-level positions and indirectly generate 10,000 additional jobs. We are proud that investment from Taiwan now supports over 156,000 jobs in the U.S.

The ongoing U.S.-Taiwan Initiative on 21st Century Trade has emerged as a milestone in our economic cooperation. During the first phase of negotiations, we established terms to enhance customs and trade facilitation, good regulatory practices, anti-corruption efforts, and small-and medium-sized enterprises. The forthcoming second phase of negotiations aims to further enhance agricultural trade while improving labor and environmental standards.

Our partnership has also flourished at the state level, with governors from many states visiting Taipei in recent years, including Arizona, Indiana, Idaho, Michigan, New Mexico, Montana, Virginia, Texas, and New Jersey. This growing engagement reflects an increasing recognition of the value that trade and investment with Taiwan brings to American communities. Notably, the number of American states' representative offices in Taiwan increased dramatically over the past few years from the single digits in 2020 to 24 in 2024, with further expansion on the horizon.

Taiwan's consistent participation as one of the largest foreign delegations at the SelectUSA Investment Summit demonstrates its commitment to fostering job-creating investments in the United States. Additionally, the U.S.-Taiwan Economic Prosperity Partnership Dialogue, established in 2020, continues to serve as a vital platform for bilateral engagement on crucial policy objectives such as supply chain resilience, clean energy, and digital trade.

Currently, workers and companies from United States in Taiwan and vice versa are subject to double income taxation, which disincentivizes Taiwanese investment in the U.S. congressional leaders have recently agreed to taking this on, developing legislative solutions to provide relief, including one that passed the U.S. House of Representatives in February 2024. We will continue to work with U.S. policymakers on a solution that levels the playing field for Taiwanese investors in the United States, and vice versa.

These developments exemplify the robust and multifaceted nature of Taiwan-U.S. economic relations. As we look to the future, we are poised for even greater collaboration and mutual prosperity.

TAIWAN IN WASHINGTON, D.C.: TWIN OAKS ESTATE

Twin Oaks, a 26-room English Georgian Renaissance-style mansion constructed in 1888, originally served as the summer residence for Gardiner Greene Hubbard, the founder of the National Geographic Society. Twin Oaks later became the official residence of the Republic of China (ROC)'s ambassadors to the United States, and has for many decades until now served Taiwan's diplomatic history well as the locale for welcoming several U.S. presidential figures including Dwight Eisenhower, Richard Nixon, Gerald Ford and George W. Bush prior to each becoming president. Twin Oaks was placed on the National Register for Historic Sites by the United States Department of the Interior in February 1986.

TAIWAN SEMICONDUCTOR MANUFACTURING COMPANY (TSMC)

PHOENIX, ARIZONA

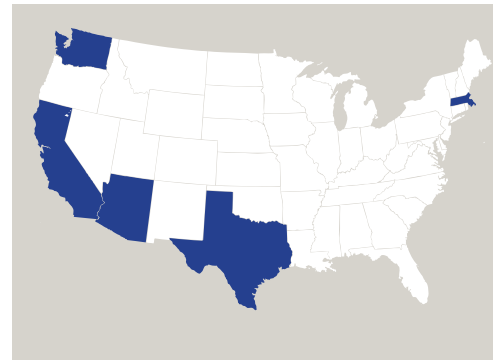

TSMC created the semiconductor Dedicated IC Foundry business model when it was founded in 1987. The company served customers and manufactured products for various applications covering a variety of end markets including high performance computing, smartphones, the Internet of Things (IoT), automotive, and digital consumer electronics.

TSMC is the world's first and largest integrated circuit foundry manufacturer. Its main businesses include wafer manufacturing, packaging, testing and technical services. TSMC is well-known in the international market for its advanced manufacturing technology and continuous innovation. It provides advanced process services to many IC design companies and plays an important role in promoting the development of the semiconductor industry. Most of the leading fabless semiconductor companies, such as AMD, Apple, ARM, Broadcom, Marvell, MediaTek, Qualcomm and Nvidia, are customers of TSMC.

To maintain its technology leadership, TSMC continues to develop novel materials, processes, devices and memories that may be adopted in the distant future and beyond. TSMC also continues to collaborate with external research bodies from academia and industry consortia alike with the goal of gaining early awareness and adoption of future cost-effective technologies and manufacturing solutions for its customers.

TSMC has announced that it will invest US\$65 billion to construct and operate three fabs in the state of Arizona. The first fab is on track to begin production leveraging 4nm technology in the first half of 2025. The second and third fab are scheduled to start production in 2028 by the end of the decade, respectively. Currently, US\$40 billion has been invested in Arizona and it is expected to create 1,600 high-level jobs and indirectly generate 10,000 jobs when fab 1 and 2 start to operate. According to Arizona Commerce Authority (ACA), approximately 13,000 workers worked on site every day during the construction.

2023 California Exports of Goods to Taiwan

DELTA ELECTRONICS AMERICAS

FREMONT, CALIFORNIA

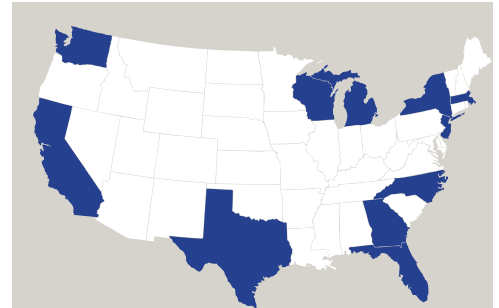

Delta, a global leader in power management and a provider of IoT-based smart green solutions, is committed to advancing cutting-edge, sustainable technologies that promote a cleaner and more energy-efficient future. Across our Americas region, which operates with a headcount of 1,470 employees across 27 offices located throughout 11 states in the United States, Canada, South America, and Mexico, we have consistently prioritized sustainability in all our operations.

A prime example of this commitment is our America regional headquarters in Fremont, California. This facility stands as a testament to our dedication, being the first green building in Fremont and the second in the Silicon Valley Bay Area to achieve the prestigious LEED® Zero Energy certification. This remarkable achievement was realized through the integration of Delta's cutting-edge energy solutions, including a 600kW rooftop solar PV system, 500kW bi-facial PV carport system and a 330kWh energy storage system. Together, these systems generate over 1.1 MWh of renewable electricity annually, fully meeting the building's energy consumption needs and establishing its net-zero energy status.

A key highlight of our headquarters is its geothermal heating and cooling system, designed to capitalize on the unique geological conditions of the East Bay. This system operates with exceptional efficiency and reliability, utilizing solar energy to power the exchange of heat through over 20 miles of underground piping. For nearly a decade, this geothermal system has provided consistent, silent operation, underscoring Delta's leadership in sustainable building technologies.

In addition to its practical benefits, the geothermal system doubles as a showcase for Delta's innovative products. It incorporates a range of our technologies, including water pumps, air blowers, drives, compressors, controls, and sensors. These components are meticulously monitored and optimized by Delta's advanced VTScada system, which ensures maximum energy efficiency and provides valuable insights for the continuous improvement of our solutions.

Our Fremont headquarters is integral to Delta's broader RE100 initiative, which commits to powering all our global operations with renewable electricity by 2030. Beyond its direct environmental impact, the building serves as a living example of how businesses can lead the way in sustainability, setting a new benchmark for green building performance and contributing to a more sustainable future.

GIGABYTE CO.

CITY OF INDUSTRY, CALIFORNIA

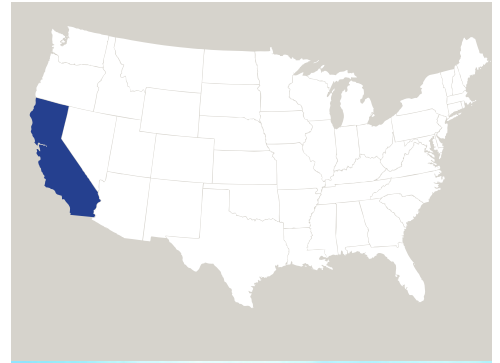

GIGABYTE™

GIGABYTE is an engineer, innovator, and leader in the tech world that offers a complete product and service portfolio of different scales to accelerate individuals and businesses in reaching their potential. With unique industry insights and strong eco-partnerships, GIGABYTE continues to expand its products and influence, enabling customers to facilitate AI implementation and future robotics, and align the advancement of computing with environment sustainability to “Upgrade Your Life.”

The company applies its hardware expertise and patented innovations to provide top-tier PC products and peripherals to enrich users’ gaming and creative experiences. It also offers flexible HPC servers, rack integration service, data center, cooling, and comprehensive AI products and solutions to empower enterprises’ success with secure, stable, reliable, and diverse acceleration options.

The consumer product lineup includes motherboards, graphics cards, laptops, monitors, storage devices, and peripherals such as keyboards and computer mice. On the enterprise side, GIGABYTE offers product solutions in storage, cloud, edge, high-performance, and AI computing, as well as server and rack-mounted computing products, integrated data centers, and advanced cooling technologies. It also establishes close partnerships with key collaborators to jointly create use case scenarios in smart living and future robotics.

GIGABYTE has invested US\$60,000,000 and hired 180 professionals to establish its US headquarters in Los Angeles with functions of marketing, sales, customer services and logistics. Per growing market demand, GIGABYTE is expanding its local operation to tailor-made manufacture with an aim to meet gradually increasing customer needs.

SUPER MICRO COMPUTER INC.

SAN JOSE, CALIFORNIA

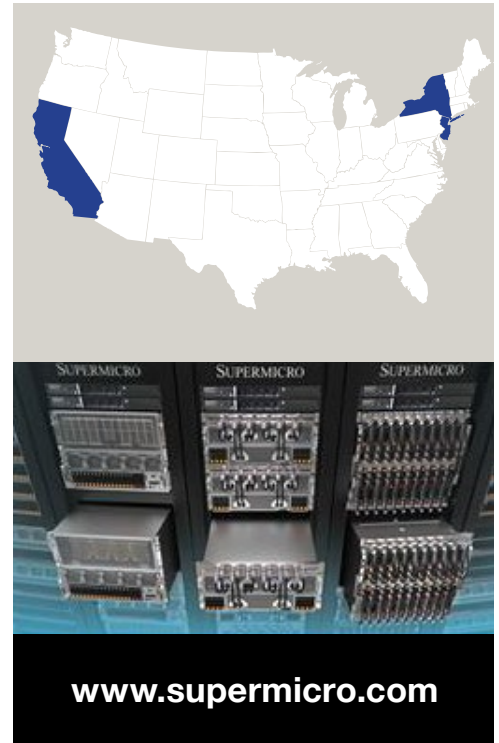

Supermicro (NASDAQ: SMCI) is a global leader in Application-Optimized Total IT Solutions. Founded and operating in San Jose, California, with manufacturing and operations in the Netherlands and Taiwan.

Supermicro is committed to delivering first-to-market innovation for Enterprise, Cloud, AI, and 5GTelco/Edge IT Infrastructure. We are a Total IT Solutions manufacturer with server, AI, storage, IoT, switch systems, software, and support services. Supermicro's motherboard, power, and chassis design expertise further enables our development and production, enabling next-generation innovation from cloud to edge for our global customers. Our products are designed and manufactured in-house (in the US, Taiwan, and the Netherlands), leveraging global operations for scale and efficiency and optimized to improve TCO and reduce environmental impact (Green Computing). The award-winning portfolio of Server Building Block Solutions® allows customers to optimize for their exact workload and application by selecting from a broad family of systems built from our flexible and reusable building blocks that support a comprehensive set of form factors, processors, memory, GPUs, storage, networking, power, and cooling solutions (air-conditioned, free air cooling or liquid cooling).

Founded in 1993, Supermicro® is a global leader in high-performance, high-efficiency server technology and innovation is a premier provider of end-to-end green computing solutions and integration/support services for Data Center, Cloud Computing, Enterprise IT, Hadoop/Big Data, HPC and Embedded Systems worldwide.

The company ships to thousands of customers including distributors, value added resellers, system integrators, and original equipment manufacturers (OEMs) as well as through our direct sales, in over 100 countries providing them with the latest server technologies including optimal configurations of memory, CPU, I/O interfaces, thermal control, storage subsystems and system management tools.

System solutions cover a broad range of applications across world-class data center and cloud services, large scalable server farms, scientific and research supercomputing clusters, businesses with complex computing requirements (such as those in financial services, oil and gas exploration, and media and entertainment companies), industrial and Internet of Things (IoT) applications, medical equipment, digital security and surveillance and emerging low-power, high-density micro server markets.

2023 Florida Exports of Goods to Taiwan

BIOTISSUE

MIAMI, FLORIDA

BioTissue is the leader in innovative technologies using products derived from human amniotic membrane tissues. Since its inception in 1997, the Company has pioneered the clinical application of human placental tissues – more than 900,000 patients have been treated with BioTissue products and the Company’s groundbreaking scientific and clinical achievements have been documented in more than 400 peer-reviewed publications.

BioTissue was born of a life-changing need—to help physicians heal wounds and chronic pain in their patients with unprecedented efficacy. By harnessing the power of human birth tissue donated by compassionate mothers, our trusted products—which have anti-inflammation and anti-scarring properties—help patients heal faster and bring the body back to its original state. For most patients, BioTissue is another chance at life. From post-op patients to pro-athletes, if their goal is to “get better”—we aim for “better than ever.”

Our evidence-based innovation has outpaced the world of regenerative medicine for more than three decades. Today, we continue to champion high-performance healing into the future.

CHENG SHIN TIRE MAXXIS INTERNATIONAL

SUWANEE, GEORGIA

Founded in Taiwan, Maxxis got its start by making bicycle tires, and soon expanded its offerings to include tires for auto, light truck, ATV, motorcycle, trailer, and more. Today, Maxxis distributes its products in more than 180 countries and has operations in Asia, North America, South America, Europe, Africa, and Australia, employing more than 30,000 people. Maxxis' ability to serve customers around the world is rooted in its manufacturing capacity, which includes facilities in Taiwan, China, Thailand, Vietnam, and India. Maxxis opened its first distribution facility in North America in 1985, and today has more than half a million square feet of warehouse space across the U.S., located in Atlanta, Los Angeles, Dallas/Fort Worth, and Indianapolis.

2023 Illinois Exports of Goods to Taiwan

HIWIN TECHNOLOGIES CORP.

HUNTLEY, ILLINOIS

HIWIN Corporation is one of the world's leading manufacturers of linear motion components, positioning systems and automation solutions. Founded in 1989 by current CEO, Eric Y. T. Chuo through the merger of precision ballscrew manufactures in Taiwan and Germany, HIWIN Corporation is a fusion of European craftsmanship and Taiwanese manufacturing excellence. HIWIN has rapidly grown to have the largest selection of motion products in the industry.

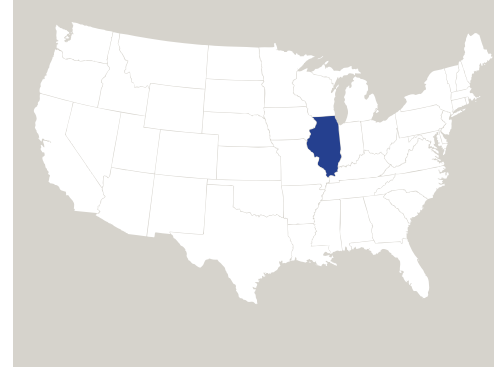

HIWIN Corporation North America

HIWIN Corporation's North American headquarters were established in 1992. Located in Huntley Illinois, HIWIN is a leading provider of linear motion components, solutions and engineering services in the US, Canada and Mexico. The company serves many major corporations in the region in a variety of industries including Machine Tools, Packaging, Aerospace, Energy and Medical and Biological Science and Semiconductor. The Huntley

HQ houses a large machining facility, labs for Quality, Engineering/R&D and Training, and a high-efficiency warehousing system. With consistent growth and investment in new technologies, HIWIN ensures best-in-class manufacturing, delivery and service to its North American customers.

Globally Networked for Comprehensive R&D and Support Excellence

With 7,000 employees worldwide and 13 subsidiaries across the globe, HIWIN maintains a highly integrated network for Sales, Manufacturing, R&D and Customer Support. HIWIN products are the result of decades of painstaking dedication to research and development. Since 1989 the company has established 8 R&D centers around the world and holds over 2760 patents in 34 countries. The company continues to develop cutting edge technologies to satisfy its customers' ever evolving automation needs. With highly trained global resources, HIWIN has positioned itself to ensure its customers receive comprehensive services and unmatched support. HIWIN is the first manufacturer of linear motion and motion control products to receive both ISO-9001 and ISO-14001 certifications and is an award winning, technology innovator with highly automated, state-of-the-art manufacturing processes to ensure manufacturing efficiency and product quality second to none.

TELAMON

CARMEL, INDIANA

Telamon Corporation's goal is to simplify business by increasing efficiency and streamlining operations for our customers. Established in 1985, Telamon specializes in solutions for telecommunication networks, wireline, wireless and industrial assembly focusing on wire harness, manufacturing, kitting and assembly. Based in Carmel, Indiana, Telamon operates in thirteen locations.

Telamon, the Greek word for "support," is the largest private minority-owned company headquartered in Indiana. The company continuously exceed customer standards and expectations in both quality and delivery and have been recognized globally through numerous awards and certifications.

Telamon's Telecom Solutions division delivers everything from supply chain services to high-quality engineering, installation, integration, and logistics and supply chain services to customers in many market areas.

Telamon's Industrial Solutions business unit encompasses two major areas of emphasis with a common goal of providing the most responsive and effective solutions to address the needs of our customers.

Driven by the highest quality standards in the automotive safety industry, Telamon's wire harness business enables connectivity for today's and tomorrow's next generation vehicle mobility solutions.

Telamon's kitting and assembly business removes roadblocks and improves efficiency for our customers with the delivery of high quality industrial assemblies and part kits.

Telamon Industrial Solution's mission is to provide exceptionally high quality and responsive solutions to enable our customers' continued success.

GARMIN[®]

Garmin has pioneered new GPS navigation and wireless devices and applications that are designed for people who live an active lifestyle. The mission of the company is to be an enduring company by creating superior products for automotive, aviation, marine, outdoor, and sports that are an essential part of its customers' lives. Garmin has a wide business and serves five primary business units, including automotive, aviation, fitness, marine, and outdoor recreation.

Garmin was co-founded by Dr. Min Kao and Gary Burrell in October 1989 to integrate Global Positioning System (GPS) technology into navigation devices for multiple markets. Dr. Kao, originally from Taiwan, is credited with the breakthrough design and engineering of the GPS software technology that formed the foundation of the original Garmin product line. As executive chairman, Dr. Kao provides ongoing support to the company's strategic planning and business development processes and continues to serve as the chairman of the board of directors.

Garmin has a vertical integration business model that keeps all design, manufacturing, marketing and warehouse processes in-house, giving the company more control over timelines, quality and service. Its user-friendly products are not only sought after for their compelling design, superior quality and best value, but they also have innovative features that enhance the lives of Garmin's customers. Garmin has more than 20,000 associates in 87 offices worldwide.

BORA PHARMACEUTICALS

BALTIMORE, MARYLAND

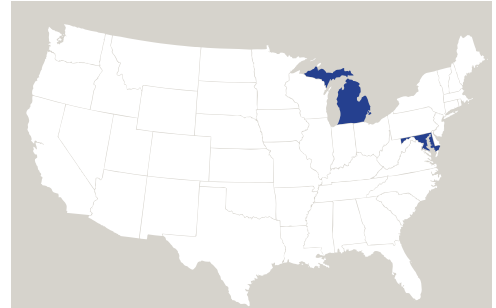

Bora Pharmaceuticals Co., Ltd. ("Bora", TWSE: 6472) successfully acquired Emergent BioSolutions' ("Emergent", NYSE: EBS) sterile manufacturing facility in Baltimore-Camden, Maryland, in June 2024.

This acquisition strengthens Bora's presence in the U.S. following its earlier purchase of Upsher-Smith Laboratories, a Minnesota-based generics manufacturer. It marks a key milestone in the Company's strategic expansion into sterile drug manufacturing and broadening its North American footprint.

The 87,000-sq. ft. facility provides sterile injectable drug product manufacturing services, offering clinical and commercial non-viral aseptic fill/finish capabilities across four fill lines, including lyophilization, vial filling, and pre-filled syringe filling.

This acquisition enhances Bora's drug substance and drug product capabilities and complements Bora Biologics, its biologics development and manufacturing arm.

About Bora: Founded in 2007, Bora Pharmaceuticals Co., Ltd. is Taiwan's largest pharmaceutical manufacturer, supplying over 100 countries worldwide. Bora aims to be a global leader in pharmaceutical manufacturing, delivering quality, efficiency, and reliability to its clients.

E INK

BILLERICA, MASSACHUSETTS

E Ink is the originator, pioneer and commercial leader in ePaper technology. The company delivers its advanced display products to the world's most influential brands and manufacturers, enabling them to install extremely durable, low power displays in previously impossible or unimaginable applications and environments.

E Ink encompasses the combined E Ink Corporation, which was spun out of the MIT Media Lab in 1997 to commercialize electronic ink and EPD technology, and Prime View International, which was established in 1992 as the first TFT LCD company in Taiwan, focusing on high quality small-to-medium-sized TFT LCDs. In 2009, Prime View acquired E Ink Corporation to further integrate and expand the EPD supply chain and the new combined companies were branded as E Ink.

E Ink's corporate philosophy centers around delivering revolutionary products, excellent user experiences, and environmental benefits through advanced technology development. E Ink has pledged reaching NetZero by 2040 and RE100 by 2030 and is committed to joining international initiatives related to carbon reduction. The Company participates in programs such as RE 100, EP 100, The Climate Pledge, and SBTi science-based targets. E Ink has adopted the TCFD framework to disclose financial impacts of climate-related risks and opportunities.

In 2021, E Ink was identified as having 99.98% Green Revenue, according to the evaluation of the Green Revenue 2.0 Data Model by FTSE Russell under the Energy Management Efficiency IT Process sub-sector.

In 2022, E Ink announced they were named one of the Asia-Pacific Climate Leaders; that they were the first display company to reach RE20, and that they are a member of the Down Jones Sustainability Indices, listed in the DJSI World Index and Emerging Markets Index. Also in 2022, E Ink was the first display company to be awarded the Dark Sky Certification by the International Dark Sky Association.

PHARMAESSENTIA

BURLINGTON, MASSACHUSETTS

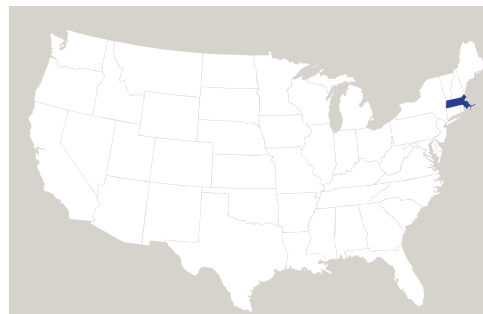

PharmaEssentia

PharmaEssentia (TWSE: 6446), headquartered in Taipei, Taiwan, is a global and rapidly growing biopharmaceutical innovator. Leveraging deep expertise and proven scientific principles, PharmaEssentia aims to deliver effective new biologics for challenging diseases in the areas of hematology, oncology, and immunology with one approved product and a diversified pipeline.

Founded in 2003 by a team of Taiwanese American executives and renowned scientists from U.S. biotechnology and pharmaceutical companies, the company has grown into a global presence with operations in the U.S., Japan, China, and Korea, and a world-class biologics production facility in Taichung, Taiwan. With over 600 employees across its subsidiaries, PharmaEssentia continues to expand. In the U.S., the company has established both Commercial Operations and PharmaEssentia Innovation and Research Center (PIRC) in Massachusetts, supported by a team of over 150 professionals.

The company's first commercialized product, Besremi®, received FDA approval in November 2021 for the treatment of adults with polycythemia vera (PV). Besremi® has also been approved for the treatment of PV in the EU, Taiwan, Japan, South Korea, China, Macau, Malaysia, and Singapore. PharmaEssentia is currently conducting a global phase III study for the treatment of essential thrombocythemia (ET) as the second indication for Besremi®.

PharmaEssentia is dedicated to addressing unmet medical needs, pioneering new drug development and technologies, and providing patients with access to affordable and effective treatments. To support this mission, the company has invested over US\$300 million into its U.S. business operations.

MOLDEX3D NORTHERN AMERICA

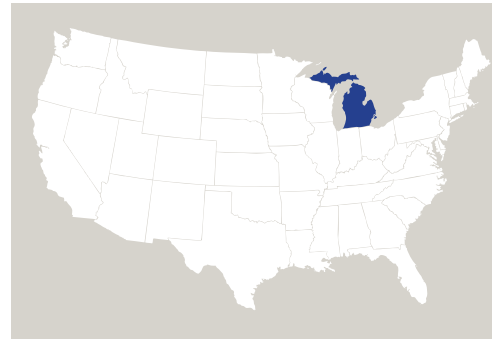

FARMINGTON HILLS, MICHIGAN

CoreTech System Co., Ltd. (Moldex3D) has been providing the professional CAE analysis solution "Moldex" series for the plastic injection molding industry since 1995, and the current product "Moldex3D" is marketed worldwide.

Committed to providing advanced technologies and solutions to meet industrial demands, Moldex3D not only developed the first mold-filling simulation software on Microsoft Windows platform, but also pioneered the launch of true three-dimensional meshing technology in the market. Started out as an academic project in Taiwan, Moldex3D has taken a strong foothold in Greater China and progressively expanded into the rest of Asia, Europe and Americas markets. Since the founding of the company, Moldex3D has been growing rapidly with 9 offices and more than 130 channel partners worldwide, servicing over a thousand customers across various industries.

With the rising demands from North American market, Moldex3D decided to set up its US office -- Moldex3D Northern America in Detroit, Michigan in 2010 to better service customers in the region. Over the course of 9 years, the company has experienced a strong growth in service requests and sales revenue. The company now employs a team of 15 highly-trained professionals in its Detroit office. An increase in manpower and a branch office is in the future plan of the company for the growing business activities and the thriving business growth.

CyberPower is a global manufacturer of uninterruptible power supply (UPS) systems. UPS systems are used broadly in desktops, servers, and data centers and are vital to the IT sector. CyberPower also manufactures power distribution units (PDUs), surge protectors, mobile charging devices and Fiber-to-the-Premise (FTTx) power solutions.

CyberPower is the fastest growing brand of UPS systems for the home and office market in the US and is among the top ten UPS power protection companies worldwide. CyberPower has pioneered energy efficiency in the industry by offering over 125 ENERGY STAR® qualified UPS systems. CyberPower has been recognized by numerous IT channel publications, including CRN and ChannelPro magazines. The company has been identified as a Top 20 Infrastructure Provider in the Data Center 100 list published by CRN magazine for 5 consecutive years (2011-2015).

CyberPower has integrated R&D, production, and distribution capabilities within the company to manage and monitor the quality of each product through and every step of the process.

CyberPower was founded in 1997 establishing corporate locations in both Taiwan and the United States. It has since then expanded its footprint to Japan, China, India, France, Germany, Russia, the Netherlands, and Mexico. The company is a trusted supplier to major resellers worldwide including: Best Buy, Wal-Mart, Amazon, Staples, CDW, Costco, and more.

2023 Mississippi Exports of Goods to Taiwan

WESTLAKE CORPORATION

BONNEVILLE, MISSISSIPPI

Westlake Corporation, which was founded by T. T. Chao from Taiwan, is invested in Mississippi – with five sites that employ approximately 530 employees and core contractors, that produce polyvinyl chloride (PVC) resin, PVC compounds and PVC pipe.

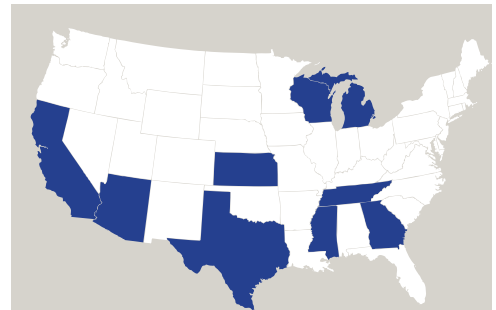

Westlake North American Vinyls operates a PVC plant in Aberdeen, Mississippi that also includes a PVC compound operation. That facility employs approximately 45% of the company's statewide employees and core contractors. Westlake is the world's second-largest manufacturer of PVC resin.

Westlake Global Compounds also operates plants in Gallman, Madison and Prairie, Mississippi. That business is one of the largest global suppliers of specialty compounds serving diverse and attractive end markets including automotive, building products, consumer goods and healthcare.

Westlake Pipe & Fittings is the second-largest PVC pipe and fittings manufacturer in the North America. The company services several distinct markets, including municipal water and sewer, residential plumbing, irrigation, agricultural and the do-it-yourself markets.

Westlake Pipe & Fittings was formed in 1991 with the purchase of a PVC pipe plant located in Kentucky. Subsequent acquisitions allowed the business to expand to other states, including Mississippi. These plants manufacture pipe with integral gasketed joints for use in potable water and sanitary sewer systems. Westlake's pipe business continued to expand through acquisitions in 2009 and in 2013, when it acquired the CertanTeed's PVC Pipe, Fittings and Foundations business. Other additions came with Westlake's acquisition of Axiall's Royal Pipe in 2016, and in 2021 with the acquisition of Lasco Fittings.

Headquartered in Houston, TX, Westlake Pipe & Fittings operates plants in Booneville, MS; Brownsville, TN; Greensboro, GA; Janesville, WI; Leola, PA; Lodi, CA; McPherson, KS; Shelby Township, MI; Wichita Falls, TX; and Yucca, AZ; Canadian plants are located in Abbotsford and Langley, British Columbia, and Woodbridge, Ontario. North American Pipe Corporation was formed in 1992 with the purchase of three PVC pipe plants located in Georgia, Kentucky, and Mississippi. All of these plants manufacture pipe with integral gasketed joints for use in potable water and sanitary sewer systems.

FORMOSA PLASTICS CORPORATION

LIVINGSTON, NEW JERSEY

Formosa Plastics®

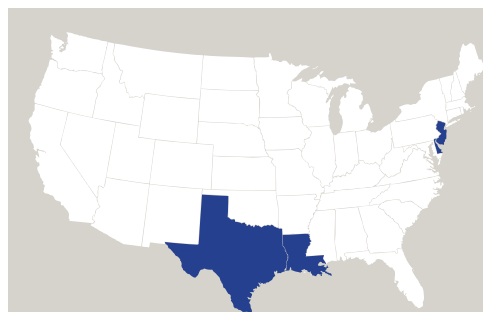

Founded in 1978, Formosa Plastics Corporation, U.S.A. is a growing, vertically-integrated supplier of plastic resins and petrochemicals. With annual revenues of more than \$6 billion, the corporation employs over 3,300 people who operate more than 20 production units in five business divisions – Olefins, Polyolefins, Vinyl, Specialty Polyvinyl Chloride, Chlor-Alkali.

Formosa Plastics Corporation, U.S.A. is headquartered in Livingston, New Jersey and has manufacturing subsidiaries located in; Baton Rouge, Louisiana; and Point Comfort, Texas.

The company has invested billions of dollars on building, expanding and streamlining its production facilities and product supply systems. The result is a manufacturing base that is among the newest, most efficient and technologically advanced in the industry. With its longstanding commitment in the U.S. market, the company is in the midst of a multi-billion dollar capital investment and construction program.

Formosa Plastics Corporation, U.S.A. is committed to supplying the highest quality products to its customers, providing a safe and healthy workplace for our employees and contributing to the quality of life in the communities where they operate. The company differentiates itself through an extensive vertical integration of its supply chain. For example, the company has a fleet of over 8,000 railcars, one of the largest in the industry, to ensure reliable product delivery to its customers. It also contributes to local community groups and universities, as well as provides scholarships to children of employees.

Formosa Plastics Corporation, U.S.A. is owned in part by the Taiwan-based Formosa Plastics Group (FPG), a global leader in petrochemicals, plastics and many other industries. Founded in 1954, FPG has grown from what was then the world's smallest PVC production facility into a worldwide organization; the group has annual revenues of more than \$74 billion and over 103,000 employees.

HOTA INDUSTRIAL MANUFACTURING

SANTA TERESA, NEW MEXICO

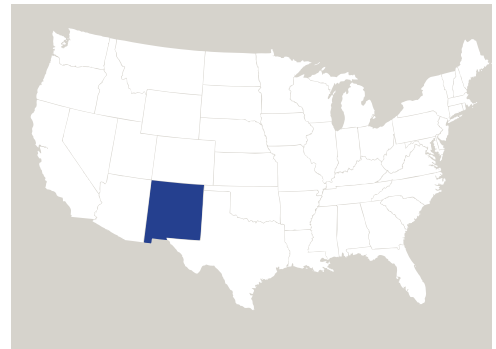

Since its establishment over half a century ago, Hota Industrial Manufacturing company has overcome many challenges and transformed itself from a small family-owned factory to the largest powertrain component maker in Taiwan. Hota produces about 20 million components annually, making it one of the largest gear makers globally. Approximately 4% of the products are sold domestically while more than 96% are exported to automakers worldwide.

Hota actively designs and builds smart production lines that align with the government's industry policies on manufacturing innovation. The company continuously optimizes its intelligent manufacturing, in-line automatic inspection, and smart auto-loading system to achieve high efficiency and cost targets. In 2020, Hota was recognized and awarded for successfully executing the technology development program offered by the Ministry of Economic Affairs of Taiwan. The program aimed to enhance intelligent production and inspection, as well as to promote technical innovation.

With a vision to become a leader in the innovative intelligent powertrain manufacturing, Hota is committed to the research and development of precision powertrain engineering and technology. Hota actively implements five key business concepts to shape its corporate culture. Through new products, new technology, and new mindset, Hota continues to sharpen its core competency while establishing its strong presence worldwide.

Hota Industrial Manufacturing is investing US\$99 million in its first U.S. factory in New Mexico, which is the auto and gear maker's first factory outside Asia. The company aims to start constructing the New Mexico plant by early 2025, and start production in due course. The factory will be built in Santa Teresa, near the U.S. border with Mexico, and is estimated to create 350 jobs for the State.

OPTRONICS INTERNATIONAL

TULSA, OKLAHOMA

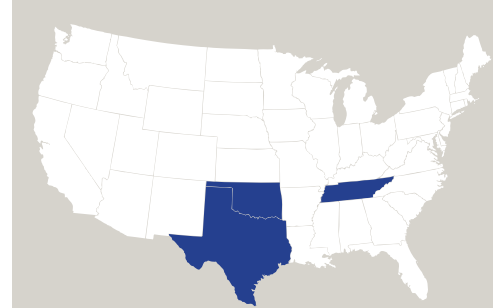

As the fastest-growing vehicle lighting and harness manufacturer in the U.S., Optronics International attributes its success to delivering innovative solutions to its customers. Founded in 1972, Optronics International is a premier worldwide manufacturer and supplier of branded industrial and commercial vehicular safety lighting products and premium, custom electrical wiring harnesses for commercial vehicle applications.

In 2012 Optronics was acquired by Taiwan-based lighting powerhouse Lucidity Group, giving it direct access to Lucidity's manufacturing strength, R&D capability and experience with the global vehicle lighting marketplace. The acquisition was the result of a longstanding, strategic relationship between the two organizations and fulfilled each company's common objective of bringing imaginative, relevant and competitive lighting technology to the North American vehicle marketplace and the larger world.

The company specializes in electrical system and harness design and interior and exterior LED and incandescent lighting for heavy-duty on- and off-highway vehicles, armored couriers, light- to medium-duty trailers, specialized vocational equipment, transit vehicles, RVs and marine equipment. The company's patented USA-PLUS system provides the most advanced molded harness connections available in the market. The Optronics product catalog is among the most extensive in the industry.

Optronics is headquartered in a 200,000-square-foot, ISO 9001-certified manufacturing, distribution, research and development facility on a 17-acre campus in Tulsa, Oklahoma. It has a 1,000,000-square-foot, IATF 16949-certified manufacturing facility in Annan District, Tainan, Taiwan. The company also has a manufacturing and distribution facility in Goshen, Indiana, and a wire harness manufacturing plant in Winnsboro, Texas.

FS-ELLIOTT

EXPORT, PENNSYLVANIA

FS-Elliott is a leading manufacturer of oil-free centrifugal air and gas compressors with sales, service, and manufacturing locations around the world. FS-Elliott provides reliable and energy-efficient compressors to a broad range of industries from oil and gas, automotive to pharmaceutical to the global markets.

The company was formed in 2003 when Taiwanese Fusheng Group acquired Elliott Turbomachinery's PAP (Plant Air Package) product line, bringing together shared values, innovation, and expertise between Taiwan and the United States.

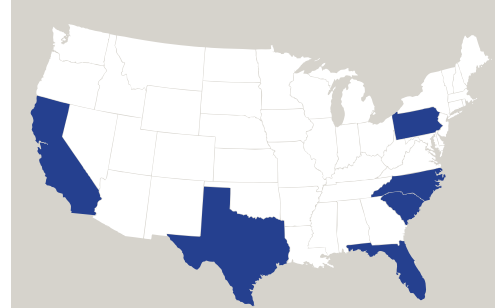

FS-Elliott solutions offer superior operating life cycle costs compared to reciprocating, rotary screw or positive displacement compressors, allowing plant owners to operate more efficiently, lowering operating costs and reducing plant emissions.

With growing sales, FS-Elliott has recently invested millions of dollars in machine tools, expanding plant operations and testing at its Pennsylvania headquarters.

The site includes two modern facilities with more than 200,000 square feet of manufacturing, office and warehouse space situated on over 30 acres of land. Thousands of FS-Elliott compressors operate worldwide in a variety of markets and applications.

Through now, FS-Elliott not only supports hundreds of jobs in the United States, but also generates millions in Pennsylvania exports.

In addition, Fusheng Group acquired Curtis-Toledo and formed FS-Curits in 2005. FS-Curits has 9 branches, operating as FS-Compression Co., across several states, including California, Texas, Florida, the Carolinas, and Pennsylvania, that employs over 200 people across the United States.

2023 Texas Exports of Goods to Taiwan

CONTINENTAL CARBON

HOUSTON, TEXAS

Continental Carbon, headquartered in Houston, Texas, has been a recognized leader in the carbon black market since its establishment in 1936. The company specializes in the development and manufacture of carbon blacks used in tire, rubber, and other specialty applications. Continental Carbon has expanded its operations across the U.S., with facilities in Alabama, Oklahoma, and Texas. Throughout the years, Continental Carbon has been at the forefront of carbon black technology development, and its technology is licensed to various third party end users globally.

In line with the global push toward sustainability, Continental Carbon's parent company, CSRC, has embarked on a partnership with SHEICO group, a leader in eco-friendly material production. Together, the two groups are set to establish North America's largest recovered carbon black (rCB) plant at the original site of Continental Carbon's Phenix plant. Scheduled to begin operations in 2026, this facility is expected to produce 30,000 tons of rCB annually, significantly contributing to reducing carbon emissions and promoting a circular economy.

This initiative is particularly timely as the world races toward achieving net-zero carbon emissions by 2050. Leading tire manufacturers, such as Michelin and Bridgestone, have set ambitious targets to incorporate sustainable materials into their products, aiming for 40% by 2030 and 100% by 2050. Such companies have also initiated actions calling for the expanded use of recovered carbon black. In the foreseeable future, major manufacturers will actively increase the proportion of rCB used in tires. The new rCB plant in North America will be a critical asset in meeting this growing demand, reinforcing the U.S. as a key player in sustainable material production.

As the global community confronts the challenges of climate change, the achievements of Continental Carbon and CSRC underscore the vital role of innovation and collaboration in building a sustainable future. The establishment of North America's largest rCB plant will mark a significant milestone in the journey towards carbon neutrality.

CTCI GROUP

HOUSTON, TEXAS

CTCI Group is a global Engineering, Procurement, and Construction (EPC) service provider, recognized for delivering reliable and responsive services to clients across various industries, including environmental, refinery, petrochemical, power, transportation, industrial, advanced technology facilities, and LNG terminal markets. With forty years of experience of managing fully integrated EPC projects worldwide, CTCI is committed to offering smarter engineering solutions tailored to each client's unique needs. To date, the Group has successfully completed over USD 5 billion worth of EPC contracts in the US, supported by a global team of more than 8,000 employees in around 50 affiliates across Asia, the Middle East, and the Americas.

As part of its global expansion, CTCI established and registered its US subsidiary, CTCI Americas Inc. in Houston, Texas in 2009. Since then, the Group has expanded its footprint in the US market, securing multiple billion-dollar contracts. In Texas, CTCI contributed to the construction of a petrochemical plant featuring the largest single module ever used for an onshore facility. In Arizona, CTCI engineered and constructed the core and shell of the fabrication building for world-class Taiwanese semiconductor manufacturer. In New Jersey, CTCI applied its expertise in Green Energy by building and operating a 9.5MW photovoltaic power plant. Additionally, in California, CTCI supported the energy transition market by building a renewable diesel facility and engineering several other petrochemical plants along the Gulf Coast.

CTCI's commitment to reliability extends beyond engineering services. We aspire to be the most reliable engineering service provider. By integrating AI with our strength in System Integration Services, CTCI is determined to act as a "Guardian of Sustainable Earth", actively engaging partners worldwide to create a sustainable, low-carbon supply chain.

GLOBALWAFERS

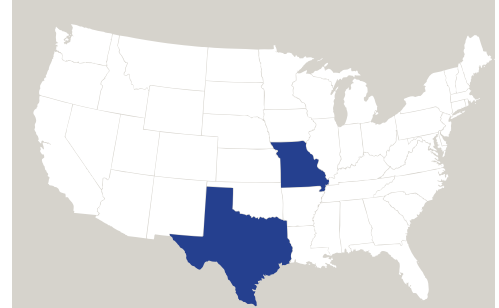

SHERMAN, TEXAS

GlobalWafers Co., Ltd (GWC), the world's third-largest producer of semiconductor wafers, is an essential supplier to the world's largest integrated circuit manufacturers, including TSMC, Intel, Samsung, Micron and Texas Instruments. With 18 manufacturing and operational sites spanning three continents and nine countries, GWC provides innovative and advanced technology solutions to transform lives around the world.

Since 2000 GWC subsidiary GlobiTech has operated the world's largest LE 200mm silicon epitaxy production facility in the world in Sherman, Texas, employing over 200 semiconductor professionals in the North Texas "Silicon Prairie." GlobiTech and GWC have been long-term contributors to the North Texas economy and a mainstay of the Grayson County business community.

In January 2023, GWC established its newest U.S. subsidiary, GlobalWafers America (GWA), and broke ground on the United States' only 300-mm fully integrated silicon wafer for advanced chips at a site adjacent to GlobiTech in Sherman. When complete, the GWA project will fill what the White House has called a "key vulnerability" within the U.S. semiconductor supply chain. Sherman will also become a key GWC Research and Development Center of Excellence bringing new talent and know-how to North Texas. When it begins production at the end of Q1 2025, GWA will add hundreds of new jobs to the Sherman economy and write the next chapter to the North Texas Silicon Prairie story.

Founded in 1980, TCI Co., Ltd. transitioned from an Original Design Manufacturer (ODM) to a Contract Development and Manufacturing Organization (CDMO) and went public in 2013. With 1,120 employees globally, TCI is headquartered in Taipei, Taiwan, and operates across Asia and North America.

The U.S. facility, TCI Biotech, LLC, in American Fork, Utah, is a key site for advanced manufacturing and logistics, supporting our North American distribution.

TCI is dedicated to “Joining and Delighting Consumer’s Life” by creating high performance products that address consumer needs. Our innovative IBD (Integrated Bioscience Design) methodology integrates multiple scientific disciplines to develop products that enhance well-being.

TCI leads the industry with significant investments in R&D, developing health foods, skincare products, functional drinks, and medical devices. TCI’s work is driven by consumer demands such as anti-aging and overall wellness.

ETERNAL TECHNOLOGY CORPORATION

SOUTH CHESTERFIELD, VIRGINIA

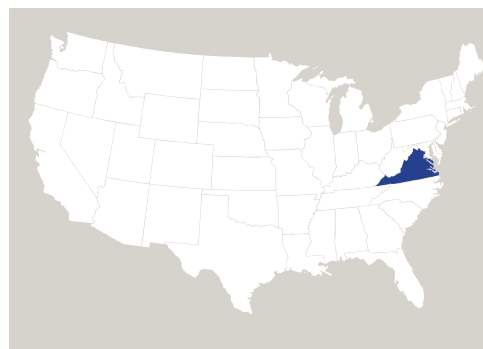

TECHNOLOGY CORPORATION

Eternal Technology Corporation is a subsidiary company of Eternal Materials, Ltd., which was founded in 1964 as a product materials company from southern Taiwan. Since then it has grown into a multinational company with its footprint in China, Thailand, Europe and the United States. It produces a wide range of materials including resin materials, high performance materials, and electronic materials for a wide range of uses from energy, and transportation to electronics, packaging and printing, and medical products.

Eternal Materials Company Ltd. extended its footprint to the United States in 1998 with its subsidiary company Eternal Technology Corporation at its 86,000 square feet plant in South Chesterfield, Virginia. The company primarily produces dry film photoresist which is used in the image-transfer process for printed circuit boards. While the product may seem quite technical and removed from the daily lives of consumers, the company's products are widely applied in the PCB industry –which are used in the daily lives of million tech-users worldwide. With the company's 30+ employee base in Virginia, Eternal Technology Corporation's global supply chain supplies half of the global market demand of dry film and has the largest production capacity worldwide.

Eternal Technology Corporation is a prime example of where U.S. and Taiwan work closely together in the tech supply chain through intermediary products.

TSMC WASHINGTON

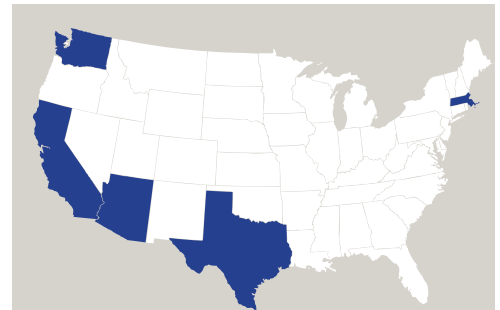

CAMAS, WASHINGTON

Founded as a U.S. limited liability company in June 1996, TSMC Washington was the first dedicated semiconductor contract manufacturer, also known as a pure-play foundry, in the United States. TSMC Washington is located on 260 acres in Camas, Washington, 30 minutes outside of Portland, Oregon, in the Pacific Northwest's Silicon Forest. The company's 1-million-square-foot fabrication complex includes approximately 130,000 square feet of clean room space.

TSMC Washington is proud to be a part of TSMC's family of fabs which comprise the world's largest dedicated semiconductor foundry operation and provides the industry's leading process technology, library and IP options and other leading-edge foundry services, such as mask making and IC packaging and testing.

TSMC Washington strives to provide the same technology, manufacturing service and quality performance as other TSMC 8 Inch fabrication facilities located elsewhere. TSMC designates TSMC Washington as Fab11 and its employees are dedicated to serving the interests of TSMC and its world-wide customers.

2023 West Virginia Exports of Goods to Taiwan

FAR EASTERN NEW CENTURY

APPLE GROVE, WEST VIRGINIA

Far East New Century, the world's largest supplier of PET, is optimistic about the domestic demand market in the United States. With relatively low energy costs and a complete upstream raw material supply chain, the advantages of production in the United States have emerged. In Feb 1, 2018, it was announced that it would spend US\$33.5 million to acquire M&G's PET plant assets in West Virginia and its Ohio R&D base through asset auction channels for the production of PET.

Far East New Century stated that it has been exporting PET products to the United States in the past, and customers are already quite familiar with Far East New Century, but it has never had its own production base locally. M&G just happened to declare bankruptcy in October 2017. Therefore, Far East New Century has the opportunity to participate in public bidding through the US bankruptcy law auction process and buy M&G's PET factory.

Far East New Century stated that this PET plant has an annual production capacity of 360,000 tons and covers an area of 424 acres. It is Far East New Century's first production base in the United States and is of great strategic significance.

JOHNSON HEALTH TECH NORTH AMERICA

COTTAGE GROVE, WISCONSIN

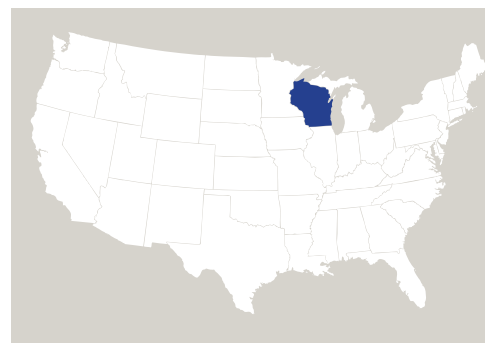

Johnson Health Tech (JHT) is an award-winning fitness equipment manufacturer. Headquartered in Taiwan, JHT is the largest fitness manufacturer in Asia and one of the top 2 in the world, with global product development, marketing and engineering based in Cottage Grove, WI. The number of retail stores and channel worldwide attained to 311, including 92 in USA, JHT continues to be “The World’s Largest Specialist Fitness Retailer.” With a product portfolio covering all fitness channels and markets, including Matrix, Vision, Horizon, its brands have been sold across more than 60 countries through 27 sales & marketing subsidiaries and numerous distributors around the world and are marketed to the commercial, specialty and home-use markets.

Johnson Health Tech was founded in 1975 by Peter Lo when he started manufacturing barbells for American companies. By the 1980s, Lo’s barbell business had expanded to the cardio fitness space, and JHT became the original equipment manufacturer for numerous industry leaders, including Trek, Schwinn, Omron, True and Universal, among others. In 1996, JHT’s first branded effort was spun off by the Trek Fitness management team-Vision Fitness, and in 1998 JHT introduced Horizon Fitness to bring higher quality and durability to the typically lower-end sporting goods/mass market channel. Three years later, JHT launched the Matrix Fitness line of products to the commercial fitness channel.

Many of the technologies invented for JHT machines have now become industry standards. From the beginning, an investment in key technologies to increase quality and add value has been a key priority for JHT.

Throughout the years, JHT has been consistently recognized by esteemed industry leaders and organizations. JHT has received numerous awards for every stage of its manufacturing process, from product development and management, technical design to retail partnerships.

TAIWAN & U.S. TIES

Innovation: Uniting U.S. And Taiwan Business

The Taiwan-U.S. partnership is a major driver of innovation in the modern global economy. Taiwan's companies work closely with their U.S. counterparts to advance cutting-edge developments in the semiconductor, artificial intelligence, biotechnology and life sciences, and clean technology sectors.

Taiwan will continue to invest in this partnership to help generate prosperous outcomes for people on both sides of the Pacific. Continued efforts between both sides to facilitate collaboration, such as the U.S.-Taiwan 21st Century Initiative, MOUs between Taiwan and U.S. states, and regular exchanges of trade and investment delegations, will further drive collaboration and enable innovation across all economic sectors.

Semiconductors

Taiwan's role as a cornerstone for global semiconductor manufacturing is well known. But collaboration with the United States is key to its success. Technology development has always relied on the strength of U.S. companies in software development and design with Taiwan's cutting-edge manufacturing capabilities. Now, with support from the U.S. government, companies in Taiwan are taking steps to further integrate supply chains with the United States to help support resilient supply chains and pursue technology development:

- Taiwan Semiconductor Manufacturing Co (TSMC) has plans for three manufacturing facilities in Arizona – \$65 billion investment for building leading edge chips in the United States. Its buildout will be supported by funding from the U.S. CHIPS and Science Act. The facility is already on track to begin production in 2025. As production begins, additional suppliers to TSMC, both from Taiwan and elsewhere, are expected to invest in Arizona.
- GlobalWafers, a Taiwanese wafer company, is investing \$4 billion to support construction of new wafer manufacturing facilities in Texas and Missouri, with support from the U.S. CHIPS and Science Act. It will be the first source of 300mm silicon wafers for advanced chips in the United States and is expected to create 1,700 construction jobs and 880 manufacturing jobs.

Artificial Intelligence

Taiwan is at the forefront of AI, due to its role as a semiconductor manufacturing hub as well as its capabilities for advanced hardware manufacturing. Not only do companies such as TSMC play a major role in producing the chips that power AI development, but Taiwan also produces 90% of AI servers used by global companies to advance AI R&D.

**880
MANUFACTURING JOBS
&
1,700
CONSTRUCTION JOBS**

U.S. technology companies Nvidia, Google, and Microsoft have plans to invest significantly in Taiwan as a major AI hub. Taiwan's Ministry of Digital Affairs has also announced a planned \$313 million investment to support the development of AI startups in Taiwan, which will include support for expanding their operations outside of Taiwan. The U.S. National Science Foundation is working with Taiwan on these efforts, helping to connect startups in the U.S. and Taiwan and organize capacity building workshops.

Clean Technology

Like the United States, Taiwan is aiming to achieve net-zero carbon emissions by 2050. Taiwan's government has developed a sustainable energy technology park in southern Taiwan that will facilitate collaboration among equipment suppliers, information and communications technology businesses and energy services providers. The energy park seeks reliable electricity generation from a wide variety of renewable sources, including solar, wind, geothermal, biofuel and marine.

Delta Electronics, a Taiwanese company, has invested in a 30-acre facility in Texas to expand its services to electric vehicles and automation, in partnership with U.S. company Texas Instruments. Taiwan's government is also supporting the establishment of

off-shore wind turbines and the solar energy industry, opening up potential areas of collaboration and investment for U.S. green energy firms.

Biotechnology and Life Sciences

Taiwan's strong contributions to healthcare and the global health community were on full display during the COVID-19 pandemic. Much of Taiwan's support for biotechnology and life sciences are conducted through Taiwan's network of science parks. Connected by high-speed rail, Taipei's Nangang Software Park, the Hsinchu Biomedical Science Park, Central Taiwan Science Park and the Southern Taiwan Science Park together enable Taiwan to occupy a prominent position in the world's biomedical value chains.

The Agreement on Scientific and Technological Collaboration signed by the United States and Taiwan facilitates additional exchanges in research and science development. During the first inaugural meeting in 2023, officials from the U.S. Institutes of Health and the U.S. National Science Foundation met with Taiwanese officials from the Ministry of Health and agreed to focus on collaboration in the areas of medical supply chain resilience and cancer research.

METHODOLOGY

The information presented in this report is based on the following methodology.

Trade Data:

Trade data are from the International Trade Administration's "TradeStats Express," accessed in September 2024.

Total Jobs Supported:

The total of jobs supported is the sum of the following three components:

- **Jobs Supported by Goods Exports:** Data for each state's exports of goods to Taiwan in 2023 are from the International Trade Administration's "TradeStats Express" for U.S. state exports. The calculation for the number of exports and the jobs supported draws from the U.S. Commerce Department's Study, "Jobs Supported by Exports 2022: An Update," which determined that \$1 billion in exports creates 3,714 jobs.
- **Jobs Supported by Services Exports:** Exports of services by each state are estimated by multiplying Exports of services by each state are estimated by multiplying the total value of U.S. services exports to Taiwan in 2023 by each state's percentage of the national services workforce. The calculation for the number of exports and the jobs supported uses the U.S. Commerce Department's Study, "Jobs Supported by Exports 2022: An Update," which determined that \$1 billion in exports creates 4,870 jobs.

- **Jobs Supported by Investment from Taiwan-affiliated companies:** The job count was collected from public disclosures and self-reporting of employment in surveys conducted by the Taipei Economic and Cultural Representative Office (TECRO) and Taipei Economic and Cultural Offices (TECOs) across the United States. The total jobs supported is a conservative estimate, since not all companies made information public through the TECO surveys. In cases where surveyed companies had locations in multiple states and did not provide disaggregated data by State, the report allocates jobs to the state where the company's headquarters is located.

Taiwan-Affiliated Companies

Information on Taiwan-affiliated companies was collected by TECRO and TECOs across the United States during the second quarter of 2024. Over 1,200 companies participated in the survey, including affiliates or subsidiaries of companies headquartered in Taiwan, and/or founded in the United States by Taiwanese citizens or Taiwanese Americans.

CONTACT

TECRO

Taipei Economic and Cultural Representative Office in the United States (TECRO) is the Taiwan's principal representative office in the United States. TECRO is responsible for maintaining and developing bilateral relations between Taiwan and the United States. TECRO has a Political Division, a Congressional Liaison Division, a Consular Division, an Administrative Division, a Press Division, an Education Division, a Cultural Division, an Economic Division, a Science and Technology Division, a Health Division, and a Defense Mission. These units are responsible for managing different aspects of the bilateral relationship.

TAITRA

Founded in 1970 to help promote foreign trade, the Taiwan External Trade Development Council (TAITRA) is the foremost non-profit trade promotion organization in Taiwan. Jointly sponsored by the government, industry associations, and several commercial organizations, TAITRA assists Taiwan businesses and manufacturers with reinforcing their international competitiveness and in coping with the challenges they face in foreign markets.

TAITRA boasts a well-coordinated trade promotion and information network of over 1,300 trained specialists stationed throughout its Taipei headquarters, five local branch offices in Taoyuan, Hsinchu, Taichung, Tainan and Kaohsiung, and 60+ overseas branch offices worldwide. Together with its sister organizations, Taiwan Trade Center (TTC), Taipei World Trade Center (TWTC) and Far East Trade Service (FETS), TAITRA has created a wealth of trade opportunities through effective promotion strategies.
